PROFESSIONAL SUMMARY

Frontend Engineer with more than 1 year of experience building and shipping scalable, production-grade web applications using React and Next.js. Delivered end-to-end products across SaaS and e-commerce, with a focus on performance, technical SEO, and accessible user experiences. Proficient in TypeScript and comfortable working across the stack with Backend technologies like PostgreSQL by Supabase and Redis by Upstash.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3/SCSS, Python, C++

Frameworks & Libraries: Next.js, React, Tailwind CSS, Redux, TanStack Query, Motion (Framer Motion)

Backend & Databases: Node.js, Supabase, PostgreSQL, Upstash Redis, REST APIs

Tools & Platforms: Git, Docker, Figma, Vercel

Practices: Technical SEO, Web Accessibility (WCAG), Performance Optimization, Agile Workflows, AI-assisted Development (Antigravity, Claude Code, Cursor)

PROFESSIONAL EXPERIENCE

Frontend Engineer (Part-Time)

Aug 2024 – Mar 2025

Bloomintek

Pune, India

- Led architecture and deployment of a production-scale e-commerce platform using Next.js, optimizing technical SEO and frontend performance for improved discoverability and user experience.
- Engineered core frontend systems and API integrations for VSA, a high-precision image annotation tool, driving successful end-to-end product delivery.
- Built and shipped Minibord, a B2B project management web app featuring intuitive Kanban-style task tracking and agile board workflows, enabling teams to manage projects with greater efficiency.

Frontend Engineer (Intern)

Feb 2024 – Aug 2024

Bloomintek

Pune, India

- Built the official Bloomintek company website using Next.js, applying advanced SEO strategies, performance-first architecture, and comprehensive accessibility standards to establish a strong web presence.
- Scaffolded and architected Docizmo, an enterprise-grade collaborative diagramming and rich-text editing platform inspired by tools like Lucidchart, designed for extensibility and real-time collaboration.
- Developed the initial version of VSA (Very Simple Annotator), a specialized browser-based tool for high-precision image annotation and structured visual feedback, laying the foundation for its production release.

PROJECTS

OpenKanban | *Next.js, TypeScript, Tailwind CSS*

Open Source

- Engineered a free, open-source Kanban board featuring a URL-based security model, which eliminated account creation and downloads, and facilitated zero-friction thought organization for 50+ users.

Clarity | *Chrome Extension, JavaScript, IndexedDB*

Chrome Extension

- Created a digital wellbeing Chrome extension that tracks browsing activity and enforces per-site time limits entirely offline. All data stays on the user's device with zero external dependencies, ensuring complete privacy.

LEADERSHIP

Web Development Lead, ACM Student Chapter – Led the web development vertical, mentored peers, and organized technical sessions on modern frontend practices.

Core Team Member, Google Developer Student Club (GDSC) – Contributed to organizing developer-focused workshops and community events on campus.

EDUCATION

PES Modern College of Engineering

Pune, India

Bachelor of Engineering in Computer Engineering

2021 – 2026
